PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate focused on full-stack development, REST APIs, responsive interfaces, and database-driven applications. Fast learner interested in UI/UX design, teamwork, communication, and exploring new technologies.

EDUCATION

Bangladesh University of Business and Technology (BUBT) <i>B.Sc. in Computer Science and Engineering — CGPA: 3.72/4.00</i>	Dhaka, Bangladesh 2023 – 2027
Doweed Public School and College <i>Higher Secondary Certificate (HSC) — GPA: 4.63/5.00</i>	Jessore, Bangladesh 2022
Jessore Shikkha Bord Gov. Model School and College <i>Secondary School Certificate (SSC) — GPA: 5.00/5.00</i>	Jessore, Bangladesh 2020

SKILLS

Programming Languages: C, C++, Python, Java, JavaScript, SQL, HTML/CSS, LaTeX
Frameworks & Platforms: React.js, Next.js, Node.js, Express.js, Spring Boot, Tailwind CSS, CustomTkinter
Databases & Tools: MySQL, MongoDB, Git, GitHub, Postman, Figma
Core Strengths: Responsive Web Design, UI/UX Principles, REST API Design, Backend Architecture, Problem Solving
Soft Skills: Team Collaboration, Effective Communication, Adaptability & Continuous Learning

PROJECTS

- FlowGraphFormer** — GitHub
Engineered an AI-powered intrusion detection system on the **CIC-IDS2017** dataset, using stratified splitting and training-only resampling to prevent data leakage and inflated results
Benchmarked baselines against advanced models (CatBoost, FT-Transformer, Graph Transformer, TabPFN) and a **hybrid ensemble**, backed by statistical tests, explainable AI, and ROC analysis
- Meal Khata** — GitHub
Developed collaborative full-stack web and Android applications for bachelor accommodation management
Implemented daily meal tracking, shared expense calculations, and automated billing
Built responsive interfaces integrated with secure REST APIs, emphasizing clean UI/UX and teamwork
- ExchangeXP (Spring Boot Backend)** — GitHub
Contributed to backend development for a team skill-trading platform using Java and Spring Boot
Developed modular API components for user and platform workflows, improving code organization for collaborative development

EXPERIENCE

- Saytica** Remote
Software Developer Intern July 2026 – October 2026
Built responsive Next.js, React, and Tailwind CSS modules, improving cross-device UI consistency and accessibility
Integrated client-side state with Node.js/Express REST endpoints, handling data fetching and validation
Turned Figma wireframes into production-ready components in an Agile, remote Linux/Git workflow
- Competitive Programmer & Problem Solver** Online / BUBT
Codeforces & BUBT Contests 2022 – Present
Competed in 3 intra-university contests and hackathons at BUBT, demonstrating algorithmic thinking
Maintain a C++ repository on data structures, algorithms, and contest-style optimization

AWARDS & ACHIEVEMENTS

- Intra-University Programming Contests:** Participated in 3 programming contests organized within my university, showcasing strong problem-solving and algorithmic thinking
- Intra-University Hackathon:** Participated in a university-organized hackathon, collaborating with a team to design and build an innovative project under time constraints
